

FIRST DEFENSE  
**PREMISE TREATMENT™**

PREVENTS FLEA INFESTATIONS

*For The Health, Safety and  
 Comfort of Your Family and Pets*

**DIRECTIONS FOR USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Children and pets should not be in the same room being treated. Do not treat pets with this product. Be careful not to use around ornamental plants.

Before treatment, vacuum all areas to be treated thoroughly and dispose of bag. Apply only to dry surfaces. Sprinkle directly onto carpeted areas at a rate of 1 lb. per 400 square feet and work into carpet using a hard bristled brush. Any material visible must be brushed into carpet fibers or removed. Also sprinkle under couch cushions and under beds and furniture. Be sure to apply in areas where pets frequently traffic or sleep. Do not vacuum for 2 weeks. Allow 2-3 weeks for maximum control. Reapply as necessary. This product will no longer be effective if a steam cleaner is used or if the product is allowed to absorb moisture.

This product is not intended to kill the adult flea population. This product kills larval stages of fleas only which prohibits future adult fleas from emerging. Therefore, please allow 10-14 days for your flea infestation problem to be eliminated. If you have a high adult flea population, you may desire to use a labeled pesticide in conjunction with this product to kill the current adult flea population.

Try these other Richard's Organics™ products for the health and wellness of your pet:
